COMMENTS FROM AMPERION, INC.

Amperion would like to submit for the record a revised measurements report that was published on September 20, 2005 by the Office of Communications (Ofcom) in the United Kingdom. This report was developed and published as the result of emission measurements taken by Ofcom at Amperion's experimental trial BPL system with Scottish and Southern Electricity (SSE) in Crieff, Scotland.

This revised version includes many significant changes for the Commission's review and explains the measurement work done by Ofcom with the SSE network in its proper context.

Respectfully submitted,

Amperion
